Robert Kennedy of Caledonia Nearly Killed in a Fight.

WARRANT FOR-HIS ASSAILANT

sorge Carmody Charged With As-Bodily Harm-Caledonia Fight.

A warrant is out for George Carmody, of Caledonia, for assault with intent to do great bodily harm less than the crime of morder. The complaint is made by Rob, Kennedy, a Caledonia salcon-keeper. It is claimed that Kennedy went home from the city last Saturday and found two men playing cards in his salcon for money. Kennedy told them to stop and a quarrel arose. One of the players went to Carmody and asked him to go to Kennedy's place while he whipped Kennedy. The deputy sheriff came in while the fight was in progress and stopped it, but Carmody suddenly struck Kennedy in the stomach and came in while the fight was in progress and stopped it, but Carmody suckenly struck Kennedy in the stomach and kneeked him down. He then kicked him in the face several times, injurying him so much that he has not been able to sit up since. The attending physician says he is not sure that kennedy will recover as he is seriously injured. Carmody will be arraigned in justice court today.

Ford traded Savage some real estate for a lot in this city, but there was a cash consideration of 8500 in the deal. Mr. Ford claims the deeds were exchanged, but that he has not received the \$500.

The case against Edward Mallery for bastardy has been adjourned to Septem-ber 28, as the complainant is confined in the county home and will not be able to sitend court before that date.

Fred Resch and William English, who were arrested for at-ailing waterrasions in Wyoming township, settled the matter by settling with the complary ant and paying follo come in central.

High temperature with improper feeding brings choices infantum, diarrhees, and convulsions.
But with the use of proper food, and there is nothing so absolutely good as lactated food, this danger may be applied. Statistics show that bubies thrive best upon lactated food. It is worth more as a preventative of choices infantum than all the medicines ever

The superlative importance of a pure, nutritious infant food, and the long study by some of the most prominent physicians in the country of infant disorders from mistakes in diet, led to the preparation of inctated food. food that can be given a baby. It more closely resembles mother's milk than any other food known. Its basis is sugar of milk, which is the basis of mother's milk. With it is combined the nutritive elements of wheat, barely, and oats, in such proportions as best meets the requirements of the growing child.

In recommending the use of this food at this season, one of Grand Rapids' best physicians said to a Herald reporter

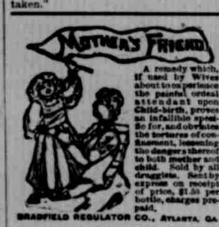

at this season, one of Grand Rapids' best physicians said to a Herald reporter yesterday: "This food should be in the hands of every mother. For in all cases of defective lactation the infant's health is best protected either by weaning and using lactated food altogether, or in any event by supplementing the natural ailment of the child with lactated food. The wonderful preservative influence of lactated food is too well known to require any further statement. It is the purest and most nourishing thing that we can find to recommend to mothers."

The thousands of testimonials from the mothers of children whose lives have been saved by lactated food are equally as convincing as the statements of the physicians. Here is what is said by the mother of as healthy a baby as can be. Mrs. George Morine of West Lynn, Mass., writes:

"I send one of my baby's pictures to prove that lactated food is the best food for babies. I have used it since he was two weeks old and it agrees with him in every respect. He has never had one sick day since he was born, and I shall always think I owe this to lactated food. He was born November 7, 1892, and was nine months old when the picture was taken."
